

## **BIOGRAPHY**

Kenneth L. Fishman, Ph.D., P.E.,  
Principal, McMahon & Mann Consulting Engineering and Geology, P.C.  
Earth Reinforcement Testing Division.

Dr. Fishman is a Principal at McMahon and Mann Consulting Engineering and Geology, P.C. and manages their Earth Reinforcement Testing Division. He has more than 35 years of combined experience in civil/geotechnical engineering that includes teaching, research and consulting. He has been a consultant, co-PI, or PI on various projects sponsored by NCHRP, FHWA, MCEER and various state departments of transportation.

Dr. Fishman has been involved in numerous projects related to condition assessment, corrosion monitoring and expected service life modeling for earth reinforcements. These projects include research, implementations of research results, training, and applications of the state of the art techniques for performance monitoring and characterization of corrosion potential.
